

BosScrew™

The only screw engineered to not loosen in plastic applications

- Best-in-class removal torque
- Dramatically advances fastening performance
- Increases manufacturing efficiency
- Reduces overall installed cost

The BosScrew™ Benefit

The latest thread form technology works to interlock with plastic. Time, temperature and vibrations actually strengthen the joint.

ADVANTAGES

- Reduces assembly components
- Saves material
- Savings in service issues
- Available in a variety of sizes and head styles

BosScrew™ 5/16
BosScrew™ 1/4*
Plastite® 5/16
PT™ Screw 5/16
Hi-Lo Screw 5/16

*Outperforms larger diameter fasteners

BosScrew™

MAXIMIZED DRIVE-STRIP WINDOW

BosScrew is the maximum performance fastener for most plastic applications. The unique thread geometry prevents slipping for the largest drive-strip in the industry.

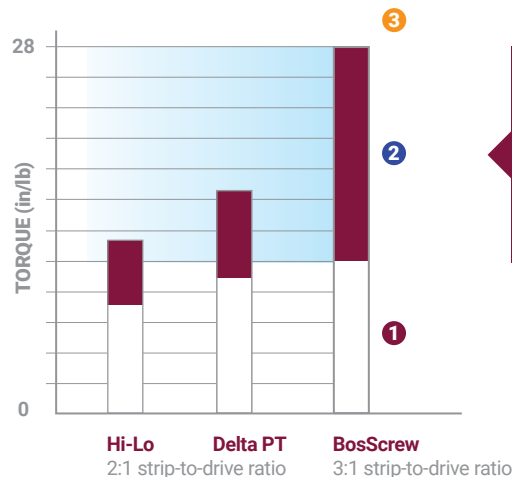

1 Thread-forming begins

2 Screw head in contact with plastic; clamp load generated

3 Strip-out torque level met or exceeded: boss damage occurs

3X
DRIVE-STRIP
WINDOW

FEATURES

Serviceability

Removable by hand with standard tooling for excellent reusability

Security

Pressure wells in the thread lock screw into place

Engineered

Pressure flanks absorb torque during installation and seating

Environmental

Allows shorter shank lengths and eliminates need for inserts

Put BosScrew™ to the test in your application.
